## Our Mission – Sustainable development

We shall contribute to a sustainable development and a fossil fuel free Capital year 2050.

Our vision for Stockholm year 2030 is: "One of the most beautiful cities in the world and the cleanest and safest Capital."

Our goals:

20% reduced demand of energi yr 2015, compared to yr 2006.

25% reduced emission of carbon dioxide yr 2015, compared to yr 2006.

## Business development

- Energy reduction strategy
- Organizational design and management
- ISO 14 001

## Project development - Gotska Sandön

## Project development - Gotska Sandön

Our reference object is in Hammarby Sjöstad

The energy performance in Stockholm Royal Seaport shall be decreased by 40%

Thicker insulation

Heat recovery by exhaust air heatpumps

Energy efficient windows

Avoiding thermal bridges

Increased airtightness by in-situ casting

Thank you for you attention!
